Flexible Automotive  
and Industrial  
Borescope System

**EASY CHECK...  
BEFORE TEARDOWN!**

Standard kit with portable  
lightsource, mirror attachment,  
extra bulb, carrying  
case and batteries

Clear, bright image and no  
disassembly

The **Value Scope** automotive borescope kit represents the latest technology in fiberoptic non-destructive testing for the industrial and automotive industry, yet is priced well below many of its competitors. It's a diagnostic tool that will save you time and money! Check cylinder heads and walls, valve seats and heads, piston crowns, crankcases, transmissions, inside door (lock and window mechanisms) all without major disassembly. Just think of the ways a professional fiberoptic scope could improve your work and profit!

## Standard Kit

VT-24 and VT-36 fiberoptic scopes with 24" or 36" X 5.8mm flexible shafts are capable of bending in any direction. The shaft can bent up to 3" radius and has a "memory" that maintains its shape. The eyepiece is focusable to within 0.5" of the target.

Each kit comes complete with a portable, battery-powered Xenon lightsource (batteries included) with an extra bulb, a right-angle mirror attachment and a custom, foam-lined carrying/storage case

CCD Cameras for viewing your image on a TV or computer monitor and various mains powered light sources also available
